

Alternative Sliding-Ball Banking System

billiards.colostate.edu

Simple approximate system using “through diamond” aiming (for banks at fast speed or with the OB close to rail)

The system requires **adjustment** for all lines except the 4-to-1.5 line:

- for lines below 4-to-1.5, **aim shorter**
- for lines above 4-to-1.5, **aim longer**

For more information and alternative systems, see the [sliding bank shot aiming systems resource page](http://billiards.colostate.edu) in the FAQ section at billiards.colostate.edu
